Everything at a Glance.

Product

- Product: ERP
- Basis: Microsoft Dynamics 365 Business Central
- Company size: Small and medium-sized companies
- Industries: Chemicals, pharmaceuticals, biotechnology, cosmetics, food, medical technology

The Two Most Important Advantages:

- Up to date and sorted: Complete overview of your current inventory at any time, sorted by item, batch, storage location and bin location, and for any storage location configuration.
- Real time information: Insight into the current status of your inventory, as all information is stored centralized in one place and automatically updated with every transaction.

Inventory Management Made Easy – and Completely **Free of Charge**

How often have you tediously searched for the current inventories of your items in Business Central? With our Yaveon 365 Advanced Inventory Summary App, we present you with the solution to overcome the shortcomings of Business Central in no time. The inventory summary, a key function of our ERP industry solution Yaveon 365, is now available to you completely free of charge.

Why Free of Charge?

Because our app benefits every Business Central user. It offers an uncomplicated introduction to the world of Yaveon and allows you to convince yourself of us and our apps without obligation. In addition, we are convinced: This app is simply too great not to share.

What You Can Expect With Yaveon 365 **Advanced Inventory Summary**:

- Complete overview of your current inventory at any time, sorted by item, batch, storage location and bin location, and for any storage location configuration.
- Insight into the current status of your inventory, as all information is stored centralized in one place and automatically updated with every transaction.

Extension Option 01

Yaveon 365 Lot Management

Everything About Lots

In combination with the Lot Management App, you receive additional information such as the expiration date, the external batch number and the batch status. Changes to the batch information can be made as quickly as a trace that shows them every use, change and posting of a batch.

The App Does Far More Than Provide an Inventory List:

- Reduced workload, fewer errors, and more time? Simply by automating your processes.
- Traditional traffic light: Increase safety with red, yellow, and green colored fields, so that you can see the status of batches at a glance.
- From raw material to end product and vice versa: You can see batch histories at a glance for a better overview and the ability to react quickly in an emergency.

Extension Option 02

Yaveon 365 Quality Assurance

Quality in Every Batch

The most important information about your batches right where you need them. With the Quality Assurance App, you can perform item and lot checks and store the results in attributes. Selected attributes can be assigned to the batch and retrieved from the inventory list at any time. The app also enables spontaneous stock checks directly from the stock list to ensure the quality of your items at all times.

The App Does Far More Than Provide an Inventory List:

- Maintain master data to display and document quality-related data of your products.
- Create inspection orders for your supply chain processes automatically, and on a document-by-document basis.
- Manage the test values per item, batch, and serial number.

Extension Option 03

Yaveon 365 Warehouse Management

Full Control Over Your Logistics

In combination with Warehouse Management, the inventory list is enhanced with information on load carriers, storage units and availability information for the current stock. It becomes the central source of information for your logistics. Spontaneous stock transfers can be initiated, and stock corrections can be booked directly.

The App Does Far More Than Provide an Inventory List:

- Use load carriers to transport items in the warehouse.
- Extend the putaway strategy for the ideal control of incoming goods flows.
- Use replenishment to guide, supply, and separate picking and replenishment zones.
